

License Consulting Services

Purchasing and Entitlement

Unlock the power of your software entitlement.

Our service will help you to truly understand your software entitlement profile maximising the value you receive from your already made software investments. Additionally we will help you to manage and control the requisition of new software by your user community and provide a procurement outsourcing service to allow you to remove the inefficiency so inherent in the software supply chain.

Insight[®] 

Purchasing and Entitlement

Business challenge

With an increasing variety of suppliers, partners, resellers and IT service providers in a typical supply chain, it can be difficult to accurately manage software contracts and the associated licenses.

As a result, many organisations struggle to identify accurate software requirements as they enter a renewal.

Our solution

The Purchasing and Entitlement service offers you complete clarity on your software entitlements as well as the associated usage rights.

- Forensically analysing your procurement data to deliver meaningful information back to you on available entitlements.
- We adopt your policies regarding the handling of software requests and the procurement of software.
- Helping you control software costs and make informed decisions around acquiring software and mitigating procurement risks.

Benefits

- Clear visibility over your software entitlement.
- Simplified procurement processes.
- Activity planning timetables to enable procurement focus.
- Assured software quotation, approval and fulfillment process.
- Accurate registration and aggregation of software entitlements.
- Ability to terminate or reduce support costs.
